-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3744

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-8, 11, and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Maurer in view of Cavalli '216. Maurer discloses an ice cream maker including a mixing blade 5 and spring means 14 which subjects the mixing blade to an axial thrust which keeps the scraper pressed on the bottom of the inner container. However, Maurer does not disclose the evaporator coil located on the bottom of the inner container. Cavalli '216 teaches an ice cream maker having an inner container and an evaporator coil 9 located on the bottom of the container. It would be obvious to substitute, for the cooling means 2 of Maurer, an evaporator coil located on the bottom of the container, for the purpose of providing a more efficient cooling means for the freezer. The shapes of the mating surfaces of the bottom of the container and the evaporator coil are considered to be matters of obvious design choice to one of ordinary skill in the heat exchange art, because no criticality or unexpected results are seen or have been disclosed for the various shapes of mating surfaces recited in claims 3-5. Also, the ratio of the height to diameter of the container is considered to be a matter of obvious design choice to one of ordinary skill in the art, as again no criticality or unexpected results are seen or have been disclosed for the recited ratio of from about 0.30 to about 0.50 in claim 6.

Art Unit: 3744

3. Claims 9 and 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
